SUMMARY

As a passionate frontend developer, I am dedicated to honing my skills and keen to stay up-to-date with the latest industry trends. Through continuous learning and hands-on projects, I strive to contribute to the development of innovative and impactful web solutions. Eager to collaborate with teams and make meaningful contributions in the field of front-end development.

PROJECTS

- **TODO App Development – TODO List App| Live Demo – Source Code**
  - Designed and developed a dynamic TODO list web application using Node.js, Express.js, and EJS templates.
  - Integrated task prioritization and categorization features for improved organization.
  - Ensured seamless cross-browser compatibility and responsiveness on various devices.

- **Weather App – WEATHERIO |Live Demo – Source Code**
  - Developed a weather application using HTML, CSS, and JavaScript, leveraging the OpenWeather API.
  - Designed and implemented a user-friendly interface with modern UI/UX principles.
  - Utilized JavaScript to handle API requests, retrieve weather data from the OpenWeather API.

- **Personal Portfolio**
  - Created a dynamic personal portfolio website using HTML, CSS, and JavaScript.
  - Incorporated GSAP library for smooth animations, custom cursor animation, smooth scroll hence enhancing the visual appeal of the website.
